200 Yards north of
The Waverly and Inn!

About 1 Mile south of
Hwy 144, Whiteland
Road crosses the four
lane Hwy 37.

We have hand peeled logs in sizes from 8 inch diameter to 20 inch diameter for posts and beams. We have a portable band sawmill that we can cut up to 16 foot logs on your site. We also have a 70 foot stationary band sawmill to custom mill logs, beams and timbers up to 65 feet in length and 32 inches square! We custom make log fireplace mantles in any length as well as several styles of heavy log stairs and out door signage projects. We are a custom handcrafted log home "shell" builder with the ability to build in four different log styles. In addition, we teach the craft to owner builders seeking to build their own handcrafted log home from scratch. We offer log handcrafted log accent work, such as heavy log trusses for entrances and interior applications for conventionally "stick-framed" homes and commercial projects.
